

---

This blog post is about cracking cambelia calcul. I'm not really sure how to do that because I have never heard of it before. That's why this blog post is instructional and factual. The tutorial for this is not finished so maybe later on today or tomorrow I can finish it up. Disclaimer: I do not own any of the pictures in this tutorial. For now, here's a picture of a calculator from Wikipedia. Here's another picture from Wikipedia. About Cambelia Calcul: Cambelia Calcul is a technology that allows people to do math wherever they go. The way it works is every time a person presses a number, the next number automatically comes up on the screen and then when you press equals, it gives that result for you.

End of Article

The following is the continuation of the article on Cambelia Calcul.

We can add decimals to our calculators too! Here's one... Here we go! Here's how to add decimals to calculators. We first need to take a pencil and make a mark on the screen to show where we will make our change

Now we will take out a calculator and set it on the number line

We need to copy the last number from the calculator

Now let's take out our own calculator and set it on the number line

We need to copy the last two numbers from our calculator

Finally, we have our final product. To get this math done by hand, you would have had to do all of them yourself. Here is a page that gives some examples of decimals

Now we have our decimal! Now we just need to take out our calculator and set it on the number line

We need to copy the second decimal from our calculator

Next, we take out the calculator and set it back on the number line. We need to copy the last number from our calculator

Lastly, we have a decimal! I hope this worked... enjoy your life! This post is about how you can do decimals in your calculators. So for this tutorial, I'm gonna show you how to put decimals in your calculators. First step is to take out your calculator

And set it on the number line

Then copy the last digits on your calculator

Now let's put decimals in our calculators

The easiest way to do that is by taking out a calculator and setting it on the number line with the least amount of digits shown. Let's say this calculator has 3 places with 1 digit each.

Next, we will take out our own calculator and set it on the number line with no more than 3 places with 1 digit each.
